

Andrew Green

Power BI Engineer — Power BI Desktop & Service · DAX · Power Query · SQL · Star Schema

Fort Lauderdale, FL (Remote, ET) | 561.339.1806 | andrewgreen04@gmail.com | linkedin.com/in/agreen8

SUMMARY

Power BI Engineer with 10+ years in business intelligence on the Microsoft data stack — Power BI Desktop and Power BI Service, DAX, Power Query, SQL, and star-schema data modeling. Built three enterprise analytics platforms end to end across the full SDLC, translating complex datasets into executive-level insights in large, complex enterprise environments. Known for data accuracy (99%), performance optimization (25% faster processing), and stakeholder engagement that lifted adoption 35%.

TECHNICAL SKILLS

- **Power BI:** Power BI Desktop, Power BI Service, dataset/semantic modeling, star schema design, DAX (calculation groups), Power Query / M, paginated reports (SSRS / Report Builder)
- **SQL & integration:** SQL / T-SQL, relational databases (Azure SQL, SQL Server), ETL (SSIS, Azure Synapse, Data Factory), SharePoint & Excel integration, Power Automate, Power Apps; Microsoft Fabric in production (Lakehouse, Direct Lake)
- **Governance & SDLC:** dataset management, workspace organization, PBIP source control (Git), requirements gathering, data profiling & reconciliation, UAT
- **Certifications (in progress):** PL-300 Power BI Data Analyst · DP-700 Fabric Data Engineer · DP-203 Azure Data Engineer

EXPERIENCE

Business Intelligence Developer — Power BI Specialist (Contract/Consultant)

Carnival Cruise Line — Remote | Jan 2025–Present

- Design, develop, and maintain interactive **Power BI dashboards, reports, and datasets (Power BI Desktop and Service)** for fleet HVAC energy across 79 ships and 8 brands — KPI strips, performance trends, operational metrics, sensor-level drill-through diagnostics.
- Analyze complex data requirements and build **efficient, scalable data models** — reusable **DAX** measures, five calculation groups, **Power Query** cleansing and transformation over live Azure SQL — for engineering, operations, and executive audiences.
- Integrate Power BI with enterprise systems — **Azure SQL**, IoT telemetry historians, cloud BMS, on-prem **SQL Server** — via three ETL pipelines orchestrated in Azure Synapse with incremental loads and scheduled refresh; 99% data accuracy.
- Maintain **governance** best practices — **dataset management, workspace organization**, PBIP Git source control — and **document data sources, transformation logic, and reporting standards** for auditability and maintainability.
- Conduct **requirements gathering** and stakeholder working sessions; **troubleshoot data quality, performance, and modeling issues** (25% faster processing) and **train business users** — lifting dashboard adoption 35%.

Senior Business Intelligence Engineer (Power BI)

Basic Fun (consumer products / toys — CPG) — Boca Raton, FL | Mar 2023–Jan 2025

- Designed the company's first enterprise **data warehouse** end to end — ingestion, ETL, **star schema design**, semantic layer, Power BI — plus **Microsoft Fabric** lakehouses publishing governed **golden datasets**.
- Built executive dashboards spanning **KPIs, operational metrics, and financial data** — sales, budget, forecast, inventory, variance-to-plan — driving a 20% Performance-to-Plan improvement; automated **scheduled report distribution** via **Power Automate**.
- Built ETL pipelines ingesting third-party point-of-sale data (web portal, FTP, email, flat file) into an Azure data lake; **incremental refresh** replaced full loads, cutting run times.
- Partnered with Finance, Sales, Demand Planning, and Operations on requirements and KPI logic — **translating business questions into analytical solutions** as Power BI reports and DAX measures.

Senior Business Intelligence Engineer

Twin-Star International (consumer products, 3-company portfolio) — Delray Beach, FL | Oct 2017–Mar 2023

- Architected the company's first enterprise **data warehouse**: dimensional models, **star schema**, **SSIS** ETL packages, and Azure Synapse for analytical processing.
- Automated P&L, Balance Sheet, and Cash Flow **financial reporting** across three portfolio companies — saving Finance 20–25 hours/month.
- Integrated Power BI with **SharePoint and Excel** — Power Apps write-back posting user commentary to a SharePoint tracker from inside Power BI; **SSRS / Report Builder** paginated reports for Excel/CSV exports.

Earlier: Business Analyst, AutoNation (2016-2017) - advanced DAX measures and SQL-based sales & pricing analytics | Financial Advisor, Merrill Lynch (2009-2016) - co-managed \$250M in assets. **Education:** B.S., Finance & Economics, Florida State University.
