
Overview

Publicis Sapient is seeking a **Senior Associate – Power BI Developer** with strong expertise across the **Microsoft Power Platform (Power BI, PowerApps, and Power Automate)**. This is an excellent opportunity for a data-driven professional passionate about building scalable reporting solutions, automating workflows, and enabling data-driven decision-making.

This is a **remote contract role** (preferred candidates near an EST or CST PS office) with a **6-month+ duration** and the potential for extension.

Core Responsibilities

- **Develop & Maintain BI Solutions:** Design and implement robust, visually engaging Power BI dashboards and reports supporting key business functions.
 - **Application Development:** Build custom business applications using PowerApps to streamline data interaction and business processes.
 - **Automation:** Use Power Automate to integrate systems and optimize workflows across departments.
 - **Cross-Functional Collaboration:** Work with product, data, and business teams to translate business requirements into technical deliverables.
 - **Data Integrity & Governance:** Ensure compliance, security, and consistency across Power Platform implementations.
 - **Performance Optimization:** Troubleshoot, tune, and enhance Power BI solutions for scalability and usability.
-

Required Skills & Experience

- Proven hands-on experience with the Microsoft Power Platform — Power BI (80%), PowerApps (20%), and Power Automate.
 - Strong understanding of data modeling, DAX, and Power Query (M language).
 - Experience integrating Power Platform with Microsoft 365, SharePoint, and other external data sources.
 - Solid analytical and problem-solving skills; ability to translate data into actionable insights.
 - Excellent communication and stakeholder management abilities.
-

Preferred Qualifications

- Experience in healthcare or insurance environments.
- Knowledge of data governance and compliance standards in regulated industries.
- Prior consulting experience or familiarity with enterprise BI environments.
