

Andrew Green

Data Analyst & Power BI Engineer — Power BI · Microsoft Fabric · SQL

Fort Lauderdale, FL (Remote, ET) | 561.339.1806 | andrewgreen04@gmail.com | linkedin.com/in/agreen8

SUMMARY

Power BI developer with 10+ years turning complex data into clear, decision-driving dashboards on the Microsoft stack. Deep Power BI (semantic modeling, DAX, Power Query) plus production Microsoft Fabric — lakehouses, Direct Lake semantic models, and pipelines that most Power BI developers have only seen in demos. Strong SQL, data modeling, and ETL, with a track record of stakeholder storytelling and rigorous data-quality validation. Currently on a remote consulting engagement (contract extended four times — the most of any consultant on the project).

TECHNICAL SKILLS

- **BI & Visualization:** Power BI (semantic models, DAX, Power Query / M), Microsoft Fabric (Lakehouse, Direct Lake, Pipelines, Dataflows, Golden Datasets), Deneb / Vega-Lite, SSRS / Power BI Report Builder, Excel / PowerPivot
- **Data & Query:** SQL, T-SQL, PL/SQL, dimensional modeling, star schema, semantic layer, reusable DAX measures
- **ETL / Orchestration:** Azure Data Factory, SSIS, Azure Synapse, incremental / watermark loaders, Python (pandas)
- **Data Quality:** profiling, reconciliation, EXCEPT-keyed validation, KPI definitions, documentation, UAT
- **Cloud:** Microsoft Azure, Azure SQL
- **Certifications (in progress):** PL-300 Power BI Data Analyst · DP-700 Fabric Data Engineer · DP-203 Azure Data Engineer

EXPERIENCE

Business Intelligence Developer — Power BI Specialist (Contract/Consultant)

Carnival Cruise Line — Remote | Jan 2025–Present

- Design and maintain multi-page **Power BI** dashboards and reports for fleet HVAC energy performance across 79 ships and 8 brands — KPI strips, per-ship trend small-multiples, worst-offender rankings, and a sensor drill-through diagnostics page.
- Early production adopter of **Microsoft Fabric** — built Lakehouse ingestion pipelines and a **Direct Lake semantic model** delivering near-real-time dashboards without dataset-refresh overhead.
- Build scalable Power BI semantic models with five calculation groups and reusable DAX measures against live Azure SQL, serving engineering, operations, and executive audiences.
- Partner with Engineering, Operations, and executive leadership to gather requirements and translate complex data into action-oriented dashboard narratives — iterating enhancements that improved stakeholder adoption by 35%.
- Enforce data accuracy and integrity: profiling and reconciliation across raw, transformed, and Power BI layers; caught a fleet-wide sentinel-value data-poison bug and added plausibility guards; validated refactors via EXCEPT-keyed diffs across multi-million-row views. Optimized SQL processing time by 25%.

Senior Business Intelligence Engineer (Power BI)

Basic Fun — Boca Raton, FL | Mar 2023–Jan 2025

- Built and maintained enterprise **Power BI** dashboards covering sales, budget, forecast accuracy, inventory, and variance-to-plan — contributing to a 20% improvement in Performance-to-Plan.
- Built **Microsoft Fabric** lakehouses and published **golden datasets** — governed, reusable data products decoupling reporting from raw source dependencies.
- Designed the company's first enterprise data warehouse end to end — ingestion, ETL, dimensional modeling, star schema, semantic layer, and Power BI reporting.
- Partnered with demand planning on predictive inventory modeling, achieving a 25% YoY improvement in forecast accuracy.

Senior Business Intelligence Engineer

Twin-Star International — Delray Beach, FL | Oct 2017–Mar 2023

- Led enterprise Power BI deployment across the organization; defined the reporting/analytics roadmap.
- Architected the company's first enterprise data warehouse: dimensional models, star schema, SSIS ETL, and Azure Synapse for analytical processing.
- Automated P&L, Balance Sheet, and Cash Flow reporting across three portfolio companies on a unified chart of accounts — saving Finance 20–25 hours/month.
- Built paginated reports in SSRS / Power BI Report Builder for complex Excel and CSV data exports.

Business Analyst

AutoNation — Palm Beach Gardens, FL | Apr 2016–Oct 2017

- Created advanced DAX measures for real-time KPI tracking across financial forecasting, sales, and inventory.
- Designed SQL-based sales analytics and pricing tools supporting inventory optimization.

Financial Advisor

Merrill Lynch — Palm Beach Gardens, FL | May 2009–Mar 2016

- Co-managed \$250M in assets; applied ETL methodologies to aggregate regulatory data and ensure compliance.

EDUCATION

B.S., Finance & Economics — Florida State University, Tallahassee, FL
