

Andrew Green

Senior Power BI Developer — Power BI · DAX · Azure Data Factory · Microsoft Fabric

Fort Lauderdale, FL (Remote, ET) | 561.339.1806 | andrewgreen04@gmail.com | linkedin.com/in/agreen8

SUMMARY

Senior Power BI Developer with 10+ years on the Microsoft data stack — interactive dashboards, data models, DAX, and Power Query backed by Azure Data Factory, Synapse, and Data Lake pipelines. Built three enterprise analytics platforms from scratch across CPG and financial domains; production Microsoft Fabric adopter (Lakehouse, Direct Lake). Known for data accuracy (99%), performance optimization (25% faster processing), and stakeholder partnership that lifts adoption (35%).

TECHNICAL SKILLS

- **Power BI:** interactive dashboards & reports, semantic/data modeling, DAX (calculation groups), Power Query / M, SSRS / Report Builder, KPI-driven dashboard design
- **Azure:** Data Factory, Synapse Analytics, Data Lake, Azure SQL, SQL Server, Microsoft Fabric (Lakehouse, Direct Lake, OneLake, REST API / TMDL)
- **Data engineering:** SQL / T-SQL, ETL pipelines, SSIS, data warehousing, star-schema modeling, incremental loads & scheduled refresh, performance tuning, Python (pandas, scikit-learn), PL/SQL
- **Deployment & governance:** PBIP source control (Git), Fabric workspace deployment (REST API / TMDL), data profiling & reconciliation, UAT
- **Certifications (in progress):** PL-300 Power BI Data Analyst · DP-700 Fabric Data Engineer · DP-203 Azure Data Engineer

EXPERIENCE

Business Intelligence Developer — Power BI Specialist (Contract/Consultant)

Carnival Cruise Line — Remote | Jan 2025–Present

- Design and develop interactive **Power BI** dashboards and reports for fleet HVAC energy performance across 79 ships and 8 brands — from fleet KPI strips and ship rankings to a sensor-level drill-through diagnostics page.
- Create **data models, DAX measures, and Power Query transformations** supporting business logic — five calculation groups against live Azure SQL — while gathering requirements and **training business users** in working sessions that improved stakeholder adoption 35%.
- Integrate Power BI with Azure: three parallel **ETL pipelines** (IoT, cloud BMS, on-prem SQL) orchestrated in **Azure Synapse** with **incremental loads and scheduled refresh jobs** — 99% data accuracy for near-real-time reporting.
- Early production adopter of **Microsoft Fabric** — Lakehouse ingestion pipelines over **Azure Data Lake** (OneLake) and a **Direct Lake semantic model** delivering near-real-time dashboards without dataset-refresh overhead.
- Ensure **data accuracy, consistency, and performance optimization** across reports — 25% faster processing, ~16x columnstore compression, EXCEPT-keyed validation on multi-million-row views.

Senior Business Intelligence Engineer (Power BI)

Basic Fun (consumer products / toys — CPG) — Boca Raton, FL | Mar 2023–Jan 2025

- Designed the company's first enterprise **data warehouse** end to end — ingestion, ETL, star schema, semantic layer, Power BI — plus **Microsoft Fabric** lakehouses publishing governed **golden datasets**.
- Built **Azure Data Lake** ETL pipelines ingesting third-party point-of-sale data from web portal, FTP, email, and flat-file sources; implemented **incremental refresh** strategies replacing full loads, cutting pipeline run times.
- Built executive Power BI dashboards covering sales, budget, forecast accuracy, inventory, and variance-to-plan — contributing to a 20% improvement in Performance-to-Plan; automated **scheduled report distribution** via Power Automate.
- Partnered with demand planning on predictive inventory modeling, achieving a 25% YoY improvement in forecast accuracy.

Senior Business Intelligence Engineer

Twin-Star International (consumer products, 3-company portfolio) — Delray Beach, FL | Oct 2017–Mar 2023

- Architected the company's first enterprise **data warehouse**: dimensional models, star schema, **SSIS** ETL packages, and Azure Synapse for analytical processing.
- Automated P&L, Balance Sheet, and Cash Flow reporting across three portfolio companies — saving Finance 20–25 hours/month.
- Migrated on-premise **SQL Server** schemas and siloed ERP data to **Azure SQL Server** via ETL pipelines.

Earlier: Business Analyst, AutoNation (2016-2017) - advanced DAX measures and SQL-based sales & pricing analytics | Financial Advisor, Merrill Lynch (2009-2016) - co-managed \$250M in assets. **Education:** B.S., Finance & Economics, Florida State University.
