Fort Lauderdale, FL | (561) 339-1806 | andrewgreen04@gmail.com | linkedin.com/in/agreen8

PROFESSIONAL SUMMARY

Business Intelligence Developer and Data Engineer with 9+ years turning complex enterprise data into trusted, actionable insight for executive and operational stakeholders. Deep hands-on expertise across the Microsoft data platform — SQL Server, Azure Data Factory, Azure Synapse, and Power BI — building SQL-based data pipelines, scalable semantic models, and production reporting that drive decisions. Proven record delivering governed data warehouses end to end, with rigorous data profiling, validation, and reconciliation to ensure metrics are accurate, reliable, and audit-ready. Trusted partner to business users, data engineers, QA, and leadership — translating business questions into well-designed models, DAX measures, and clear visualizations within governed, self-service analytics environments. Local South Florida candidate.

TECHNICAL SKILLS

BI & Reporting: Power BI (Semantic Models, DAX, Power Query), Power BI Report Builder, SSRS (Paginated), Tableau, Excel

Data Platforms & Warehousing: MS SQL Server, T-SQL, Azure Synapse, Snowflake, Databricks, Oracle; Dimensional / Star-Schema Modeling

ETL & Integration: Azure Data Factory (ADF), SSIS, Microsoft Fabric (Lakehouse, Pipelines, Dataflows), Incremental Refresh, API Integrations (Python)

Data Quality & Governance: Data Profiling, Validation & Reconciliation, Data Dictionary, KPI Definition, Data Lineage, Report Validation, UAT

Cloud & Tools: Microsoft Azure, AWS (S3, Redshift, Glue, Lambda), GCP, Git, Tabular Editor, DAX Studio

Languages: SQL, DAX, T-SQL, Python

Certifications (In Progress): PL-300 Power BI Data Analyst Associate; DP-203 Azure Data Engineer Associate

PROFESSIONAL EXPERIENCE

Carnival Cruise Line — *Business Intelligence Developer / Power BI Specialist* Remote • Jan 2025 – Present

- Designed and built enterprise Power BI dashboards and semantic models delivering near-real-time operational monitoring and actionable insight across fleet-, ship-, and unit-level views — achieving 99% data accuracy for operational and executive reporting.
- Orchestrated and automated ETL through Azure Data Factory and Azure Synapse pipelines, improving refresh reliability and standardizing data delivery; optimized SQL extraction and transformation logic, reducing data processing time by 25%.
- Partnered with data engineering to ingest and standardize heterogeneous sources — SQL Server databases, IoT sensor feeds, vendor automation tags, APIs, and cloud repositories — into governed reporting models.
- Performed data quality validation, profiling, and reconciliation across raw source data, transformed reporting layers, and Power BI outputs to ensure trusted, accurate metrics for operational and executive decisions.
- Authored data dictionaries, KPI definitions, DAX measures, transformation logic, and reporting standards to support data governance, knowledge transfer, and long-term maintainability.

Basic Fun — *Senior Business Intelligence Engineer (Power BI)*

Boca Raton, FL • Mar 2023 – Jan 2025

- Architected the company's first enterprise data warehouse end to end — from dimensional / star-schema design through Azure Data Factory ETL pipelines — establishing a governed single source of truth for executive reporting.
- Built and maintained a suite of Power BI dashboards surfacing business-critical KPIs to the Executive Leadership Team — improving budget tracking and variance analysis, contributing to a 20% improvement in Performance-to-Plan outcomes.
- Built custom Python API integrations via Azure Data Factory, calling the Amazon Selling Partner API and Walmart vendor API to extract marketplace data — parsing JSON payloads into a Microsoft Fabric Lakehouse that powered Power BI demand forecasting for four teams, improving forecast accuracy 25% YoY to 78%.
- Deployed an Azure data lake and ETL pipelines ingesting third-party point-of-sale data from web portals, FTP, email, flat files, and external databases.
- Implemented incremental refresh in place of full loads and performed ongoing ETL performance tuning, improving pipeline efficiency and reliability for large business-critical datasets.

Twin-Star International — *Sr. Business Intelligence Engineer*

Delray Beach, FL • Oct 2017 – Mar 2023

- Defined the enterprise Power BI reporting roadmap and technical architecture, engaging stakeholders across Finance, Sales, and Operations to assess data requirements and ensure accountable delivery.
- Migrated transactional data from multiple siloed ERP systems into an Azure SQL Server operational data store using SSIS ETL packages; built a scalable data warehouse on Azure Synapse for parallel analytical processing.
- Integrated general ledger data across three portfolio companies into a unified chart of accounts, automating P&L, Balance Sheet, and Cash Flow reporting — cutting 20–25 hours/month of manual Finance team preparation.
- Created paginated SSRS reports published to Power BI Service; engineered a Power Apps write-back solution enabling report users to input commentary directly within Power BI custom visuals.

AutoNation — *Business Analyst*

Palm Beach Gardens, FL • Apr 2016 – Oct 2017

- Built an automated Python tool to ingest and parse Vehicle Report data from PDFs, applying custom appraisal logic to calculate optimal bid prices and profit margins — transforming a manual process into a data-driven decision system.
- Designed SQL queries and advanced DAX measures for interactive Power BI dashboards covering real-time KPI tracking, financial forecasting, sales performance, and inventory optimization.

Merrill Lynch — *Financial Advisor*

Palm Beach Gardens, FL • May 2011 – Mar 2016

- Junior partner on an advisory team managing \$250M in client assets; built foundational financial reporting expertise — P&L, Balance Sheet, Cash Flow — that underpins current BI and data engineering work.

EDUCATION

Florida State University — Bachelor of Science, Finance & Economics
