

Andrew Green

Senior Power BI Developer — Microsoft Power Platform (Power BI · Power Apps · Power Automate)

Fort Lauderdale, FL (Remote, ET) | 561.339.1806 | andrewgreen04@gmail.com | linkedin.com/in/agreen8

SUMMARY

Senior Power BI developer with 10+ years building enterprise reporting and analytics on the Microsoft stack. Deep Power BI — semantic modeling, DAX, and Power Query (M) — paired with hands-on Power Apps and Power Automate delivery: embedded write-back apps, automated distribution flows, and SharePoint / Microsoft 365 integration. Currently on a remote consulting engagement (contract extended four times — the most of any consultant on the project). Strong stakeholder partner who translates business requirements into governed, scalable technical deliverables.

TECHNICAL SKILLS

- **Power Platform:** Power BI, Power Apps, Power Automate, Power BI Report Builder / SSRS, Power Query (M), DAX
- **Data Modeling:** Dimensional modeling, star schema, semantic models, calculation groups, reusable DAX measures
- **Integration:** Microsoft 365, SharePoint, Azure SQL, Azure Data Factory, Azure Synapse, REST APIs, external / 3rd-party data sources
- **Cloud & Platform:** Microsoft Azure, Microsoft Fabric (Lakehouse, Direct Lake, Pipelines, Golden Datasets)
- **Query / Languages:** SQL, T-SQL, PL/SQL, Python
- **Governance & Delivery:** Data validation & reconciliation, KPI definitions, documentation, UAT, Agile, Git (PBIP source control)
- **Certifications (in progress):** PL-300 Power BI Data Analyst · DP-700 Fabric Data Engineer · DP-203 Azure Data Engineer

EXPERIENCE

Business Intelligence Developer — Power BI Specialist (Contract/Consultant)

Carnival Cruise Line — Remote | Jan 2025–Present

- Design and maintain multi-page Power BI dashboards and reports for fleet HVAC energy performance across 79 ships and 8 brands — KPI strips, per-ship trend small-multiples, worst-offender rankings, and a sensor drill-through diagnostics page.
- Build scalable Power BI semantic models with five calculation groups and reusable DAX measures serving engineering, operations, and executive audiences against live Azure SQL.
- Partner with Engineering, Operations, Fuel Performance, and executive leadership to gather requirements, define KPI logic, and translate complex data into action-oriented dashboards — iterating enhancements that improved stakeholder adoption by 35%.
- Optimized SQL extraction, transformation, and validation for large-scale datasets, reducing data processing time by 25% while improving refresh performance and reporting scalability.
- Established data-integrity practice: profiling, reconciliation across raw, transformed, and Power BI layers, and documentation of dataflows, KPI definitions, DAX measures, and refresh processes for governance and auditability.
- Early production adopter of Microsoft Fabric — built Lakehouse ingestion pipelines and a Direct Lake semantic model delivering near-real-time dashboards without dataset-refresh overhead. Report under Git (PBIP) source control.

Senior Business Intelligence Engineer (Power BI)

Basic Fun — Boca Raton, FL | Mar 2023–Jan 2025

- Built and maintained enterprise Power BI dashboards covering sales, budget, forecast accuracy, inventory, and variance-to-plan — contributing to a 20% improvement in Performance-to-Plan outcomes.
- Automated daily/weekly report distributions and alerts with **Power Automate**, querying Power BI data on scheduled flows to improve stakeholder follow-through and reporting consistency.
- Designed the company's first enterprise data warehouse end to end — source ingestion, ETL, dimensional modeling, star schema, semantic layer, and Power BI reporting.

- Partnered with Finance, Sales, Demand Planning, and Operations to capture requirements, define KPI logic, and translate business questions into Power BI reports and DAX measures.

Senior Business Intelligence Engineer

Twin-Star International — Delray Beach, FL | Oct 2017–Mar 2023

- Led enterprise Power BI deployment across the organization, defining the reporting/analytics roadmap and delivery accountability.
- Built a **Power Apps** write-back solution embedded in Power BI custom visuals, letting report users post commentary to a **SharePoint** Product Tracker without leaving the report — closing the loop between reporting and action tracking.
- Built paginated reports in SSRS / Power BI Report Builder for complex Excel and CSV data exports.
- Automated P&L, Balance Sheet, and Cash Flow reporting across three portfolio companies on a unified chart of accounts — saving Finance 20–25 hours/month.
- Architected the company's first enterprise data warehouse: dimensional models, star schema, SSIS ETL, and Azure Synapse for analytical processing.

Business Analyst

AutoNation — Palm Beach Gardens, FL | Apr 2016–Oct 2017

- Created advanced DAX measures for real-time KPI tracking across financial forecasting, sales performance, and inventory optimization.
- Designed SQL-based sales analytics and pricing tools supporting inventory optimization and bid-price calculation.

Financial Advisor

Merrill Lynch — Palm Beach Gardens, FL | May 2009–Mar 2016

- Co-managed \$250M in assets as junior partner on a wealth management team; applied ETL methodologies to aggregate regulatory data and ensure compliance with financial laws and internal policies — data governance in a regulated industry.

EDUCATION

B.S., Finance & Economics — Florida State University, Tallahassee, FL
